Power: 4 SCALE: 2 RESISTANCE: 2
SHIELDS: 4 CREW COMPLEMENT: 1

ATTACKS & SPECIAL RULES:

- Disruptor Cannons (Energy, Range Close, 5♣, Vicious 1)
- Micro-torpedoes (Torpedo, Range Long, 5♣, High Yield)
- Cloaking Device Fast Targeting Systems

Entered Service: 2375

Overview: Created in the final days of the Dominion War, the *Scorpion* assault fighter was designed to counter Jem'Hadar attack ships. Given the design's relative vulnerability against larger vessels, during the war *Scorpion* fighters were piloted almost exclusively by Re man slaves. Starfleet first encountered the *Scorpion* fighters in 2379 aboard the prototype warbird/ carrier, the *I.R.W. Scimitar*.

Capabilities: Given their small size, *Scorpion* fighters are powered by a matter-antimatter reactor rather than an artificial quantum singularity. They are equipped with relatively potent armaments, including disruptor turrets supplemented by torpedoes, shielding, and a miniature cloaking device. The small size of the ship means it can only remain cloaked for a few minutes at a time, just long enough to position itself for a strike or retreat back to its carrier.

ATTACKS & SPECIAL RULES:

- Disruptor Banks (Energy, Range Close, 2♣, Vicious 1)
- Disruptor Banks (Energy, Range Close, 2♣, Vicious 1)
- Cloaking Device

Entered Service: 2266

Overview: The standard shuttles of the Romulan Star Empire, *Tiercel*-type craft are used for transporting personnel between starships and space stations and planetary bodies. *Tiercel* are larger than most Starfleet shuttlecraft—being comparable to a Runabout—as the increased size was needed to accommodate the larger power plant necessary for powering a cloaking device. In addition to transportation, *Tiercel* ships are used for scouting missions and reconnaissance missions across the border.

Capabilities: As a high percentage of their reactor's power was allocated for the cloaking device, *Tiercel* ships have limited weapons and shielding. They are capable of low warp speeds, but have trouble maintaining their cloak beyond Warp Two. With their suite of sensors, *Tiercel* are quite capable of scientific missions, but this equipment is typically used for communication interception and espionage.
