

STAR TREK CAMPAIGNS BEYOND

“The Crucible”

THE CRUCIBLE

Suggested Eras: The Original Series, The Next Generation

The **Crucible** is one of the nicknames for the region of space between Psi Octanis and Tau Centauri. In the twenty-second century, this region of space is only beginning to be settled and explored by the Federation, with no contact as yet with the Zaldorn. By the twenty-third century, the Zaldorn have joined the Federation, and Deep Space Six established. Complicating exploration is the proximity of the Romulan Star Empire, and vast regions of unexplored space and species. A TOS campaign launches from either Starbase 84 or Starbase 247, and there has not yet been contact with the Zaldorn, nor a Deep Space Six.

The following lists suggest missions for specific hexes in this region, but feel free to add other adventures as desired. Missions have been selected to fit with the *TOS* era, but are easily adjusted for the *TNG* era of play.

Source of missions: If you are running the mini-campaign from the Tricorder Starter Set, a location has been suggested. The next set is taken from free Mission Brief collections from Modiphius. The final set is *TOS* era adventures taken from diverse sources published by Modiphius.
