PERSEPHONE CLASS - DECK 1

The Persephone-class was designed for colony and border operations as well as survey missions within and near Federation territory. This ship class was intended to serve as a science vessel with enough shielding and firepower to withstand spatial and enemy threats long enough to escape or await assistance from other Starfleet vessels. It has limited cargo space and the lack of any kind of galley, fully reliant on replicator systems.

First of its class, the U.S.S. Persephone entered service in 2348 and has undergone three refits. Its motto is: "Swift like the wind, from the shadows she shall rise!"

Length 262.50 m; Width 148.91 m; Height 40.02 m
 Number of Decks: 10
 Standard Crew Complement: 97
 Maximum Warp: 9.45
